UTILITY DISCONNECT RELEASE FORM

The owner of the structure located at _____ has applied for a demolition permit with the City of Branson. This release form is required to be signed by all the appropriate utility companies certifying proper disconnection of the utility for which they are responsible. A copy of an approved DNR certification is required before the City of Branson will issue a demolition permit.

In order for a demolition permit to be issued by the City of Branson, all applicable signatures must be obtained from the responsible utility companies.

If the particular service is non-existent or has been previously disconnected, please mark N/A and add signature.

Electric Service

Signature and Date

Water Service

(Closest to the water meter as possible)

Signature and Date

For sewer/water service disconnect inspections, please contact the Utilities Department 417-243-2731.

DEMOLITION ASBESTOS REPORTING

In order to assist the Missouri Department of Natural Resources, the City of Branson would like to share the following information with you:

Determining if your project will involve regulated structures

The Missouri Department of Natural Resources regulates most demolition projects involving institutional, commercial, public, industrial, or residential structures. The only exception to this regulation is for a single residential structure that contains four dwelling units or less. Projects that involve two or more residential structures are not exempt. If the residential structure has been used during the course of its history for any purpose other than residential, such as being converted from residential to office use or converted from commercial to residential use then it is no longer exempt.

Regulated structures must be inspected by a Missouri certified asbestos inspector and if the asbestos inspection identifies regulated quantities of asbestos then the removal must be performed by a Missouri registered asbestos abatement contractor.

Demolition notification - it must be provided to the DNR department **at least 10 working days prior to the demolition of any regulated structure**. This notice is required even if there is no asbestos identified on your project. A copy of the asbestos inspection report must accompany this notification.

It is the obligation of both the owner and any contractors involved to ensure that these notices are provided to the department and the department will issue an approval letter for all regulated asbestos abatement and demolition project notifications.

If you need assistance with finding a Missouri registered asbestos abatement contractor or inspector, a list of is on the department's Web site at www.dnr.mo.gov/env/apcp/Asbestos.htm

For more information on the department's asbestos requirements, you may contact the department's Air Pollution Control Program or one of the department's other offices:

Missouri Department of Natural Resources Air Pollution Control Program
P.O. Box 176
Jefferson City, MO 65102 (573) 751-4817 - phone
(573) 751-2706 - fax
