ELECTRICAL SERVICE INSTALLATION WORKSHEET

Project Address _____ Permit # _____
Office Use

Contractor or Owner Name _____

Service Provider (check a box): Empire Electric White River Electric

Electrical Service Upgrade (check a box): Residential Commercial

Please provide the following information.

1. Current size of service: _____ amp.
2. Current grounding system:
 - ground rod grounding ring concrete encased electrode
 - plate metal water service
3. Proposed size of service upgrade: _____ amp.
4. Proposed grounding system update:
 - ground rod grounding ring concrete encased electrode
 - plate
5. Current service: overhead underground
6. Proposed service: overhead underground

Per Branson Municipal Code (BMC) Section 18-47:

- The service disconnecting means shall be installed at a readily accessible location outside of a building or structure. This requirement shall apply when replacing an electric panel and when replacing a service disconnect not in a readily accessible location outside of a building or structure.
- Where an owner is doing work on **OWNERS** personal residence, all wiring from the point of utility connection into the structure shall be of copper conductors.

Per National Electric Code (NEC) 2014:

- The combination meter/main service disconnect enclosure to be installed shall be rated as a NEMA 3R.
- Service Grounding Conductors shall be sized accordingly as per 250.66 and Service Conductors as per 310.15.(B) (6) and properly identified.
- Connection of the Main Bonding Jumper as per 250.28
- Disconnect enclosures shall be properly/permanently identified, not located above stairs, properly bonded.
- Service riser conduit is to be of Schedule 80 if PVC, properly secured and clearances observed.
- If a metal sweep is used less than 18" below grade, it is to be bonded with the grounding conductor.

**CITY OF BRANSON
ELECTRICAL SERVICE INSTALLATION WORKSHEET**

Note: If a new service is replacing a combination disconnect/breaker panel that is located on the inside of the building, separate grounding and grounded buss terminals will be required and all conductors appropriately located. In addition, if this electric service installation is for new construction in multi-unit buildings, the drywall in the immediate area of the breaker panel and a GFIC must be installed (1-per floor). The panel cover must also be available for immediate installation after inspection.

After obtaining a permit and initiating the install, call the inspection line at 417-337-8505 for a rough in inspection to inspect any/all of the following:

- trench
- riser mounting/attachment
- bonding and grounding electrode placement/connections
- conductor applications

If approved, an orange “Approved” sticker will be placed on the enclosure and the Service Provider can be contacted for service activation. A final inspection is required. Please call the inspection line.

In the space below, or on a separate attached sheet, please diagram an overhead view, (site plan), showing the current and proposed service locations as well as any trenching and setback dimensions which will be incorporated into the work.

Meter Location & Address:_____

Size(S) & Intended Service of Meter(S) or Tap(S):

Domestic _____(Qty)_____ (Size) Irrigation _____(Qty)_____ (Size) Fire Tap _____(Qty)_____ (Size)

Ordinance #2013-0178 - Branson Municipal Code Section 90-26:

For Any Installation Of New Meter Service, The Applicant Shall Pay All City Costs For The Installation Including Meter, Parts, Materials, Labor And Equipment.

A Deposit Will Be Required Prior To Water Being Turned On!

Water Pressure Reducing Valve or Regulator: where water pressure within a building exceeds 80 psi static, an approved water pressure reducing valve conforming to ASSE 1003 with strainer shall be installed (by the property owner’s plumbing contractor) to reduce the pressure in the building water distribution piping to 80 psi static or less. Exceptions to this requirement are service lines to sill cocks and outside hydrants, and main supply risers where pressure for the mains is reduced to 80 psi or less at individual fixtures.

Date of installation may vary depending on availability of parts. Please allow for up to eight (8) weeks for installation.

I do hereby agree that the above billing address is the responsible party for payment of meter invoices. All payments are due and delinquent after 30 days of invoicing.
